NOTE: Information shown on this map is for planning purposes only. Wetland information is subject to change. There may be unmapped wetlands subject to regulation, and all wetland boundaries shown are approximate. Most farmed fields have a complex wetland-upland pattern. Farmed wetlands shown on map illustrate wetland presence, not precise location and extent. In all cases, actual field conditions determine wetland boundaries, and a wetland delineation is generally needed prior to site development. You are advised to contact the Oregon division of State Lands and the Army Corps of Engineers with any regulatory questions.
